

Create a lightweight Leads Management System with basic CRUD functionality, user authentication, and role-based access.

Core Features:

1. Authentication:

- Use Laravel Breeze or Laravel UI (your choice).
- Admin and Sales Executive roles.
 - Admin: Full access
 - Sales Executive: Can only manage their assigned leads

2. Lead Management:

- Create a **leads** table with fields:
 - Name
 - Email
 - Phone
 - Lead Source (e.g., Website, Referral, Ad, etc.)
 - Status (New, Contacted, Converted, Lost)
 - Assigned To (User ID)
 - Remarks (Text)
 - Created At / Updated At
- Functionality:
 - Admin can view and assign leads to Sales Executives
 - Sales Executive can view only their leads
 - CRUD operations on leads
 - Filter by status & lead source

3. Dashboard:

- Show:
 - Total leads
 - Leads by status (use charts if possible)
 - Logged-in user's assigned leads (for Sales role)

4. Optional (Bonus if completed within time):

- Ajax-based filtering
- Export leads to CSV

***Estimated Completion Time: 6–7 hours**
